

Madrid, 20th January 2023

Whom it may concern,

SENSIA as a company dedicated to the design, development and manufacturing of infrared technology devices, in order to fulfill this commitment, the company's management has decided to implement a Quality and Environmental Management System, according to UNE-EN-ISO 9001: 2015 Standard and UNE-EN-ISO 14001: 2015 Standard.

With the implementation of this Quality and Environmental Management System it is intended to achieve, among others, the following objectives:

- ✓ Work in a respectful way with the environment, always complying with the environmental legal requirements that apply to us.
- ✓ Comply with environmental requirements voluntarily assumed.
- ✓ Continuous improvement, prevention of pollution and environmental protection.
- ✓ Provide a framework to establish and review environmental objectives and goals.

One of the principles of the standard requires us to carry out with the evaluation of all our suppliers. For this evaluation, we require you to send us a copy of the Certificate of your Quality System according to the ISO 9001 or 14001 Standard.

If you do not have a Quality or Environmental System, please communicate us what measures can be adopted to guarantee the quality of products or services that you provide to us or the measures to guarantee the environmental protection.

Within the framework of this commitment, we consider of great importance that those who provide us services are also aware that their activities could have a negative impact on the environment.

### **CHEMICAL SUBSTANCES**

- Be sure to load / unload products that do not spill.
- All containers of dangerous products that they use must be identified.
- If you transfer substances, perform it on protected ground.
- If spills occur, collect them with absorbents.

PROVIDER		
ACTIVITY	DATE	

#### **ENVIRONMENTAL ASPECTS GENERATED**

MUNICIPAL SOLID WASTE	AIR EMISIONS	
HAZARDOUS RESIDUES	NOISE EMISSIONS	
INERT WASTE	CHEMICAL SUBSTANCES	
	EFFLUENTS	

We remind our providers that they must carry out the following requirements:

### **MUNICIPAL SOLID WASTE**

- Deposit the residues in specified containers.
- Do not mix these residues with hazardous residues.

# **HAZARDOUS RESIDUES**

- If the company generate this type of residues, you must manage it according to the provisions of the legislation.
- Never dispose them in urban waste containers or other hazardous waste.

# **INERT WASTE**

- If the company generate this type of residues, you must manage it according to the provisions of the legislation.
- Do not mix these residues with hazardous residues or municipal solid waste.

### **EFFLUENTS**

- No toxic or hazardous substances will be discharged into the sewer system.
- If any accidental spillage that could contaminate the medium occurs during the work, an absorbent should be applied as soon as possible and properly managed by a licensed waste manager.

### **AIR EMISSIONS**

• All equipment will have adequate maintenance and, if necessary, must have passed inspections by Administration Control Bodies.

### **NOISE EMISSIONS**

All machinery used must be in an adequate state of maintenance to avoid unnecessary noise.

In addition, we inform you that they have the possibility of carrying out good environmental practices that help minimize such impacts, as well as the existence of environmental legislation that is mandatory and that you will have to comply with based on your activities.

All the information sent is confidential and its copy and / or distribution to third parties is not allowed, being only and exclusively for its application when work is done on our behalf.

Trusting that you share our concern to be respectful of the environment that surrounds us,

Yours faithfully,

Calle Margarita Salas, 12 28919, Leganés (Madrid) Tel.: 91 055 92 90 CIF: B-85560340
